PORTFOLIO
minajevtic7523.github.io/MinaJevtic

PROFILE

Web developer and third-year ICT student in Belgrade. I build full-stack web applications with PHP, Laravel and MySQL, and responsive front ends with HTML, CSS and JavaScript. Comfortable setting up Linux servers and working with Git. Seeking a remote or full-time web development role, and open to freelance projects.

EDUCATION

ICT College of Vocational Studies, Belgrade

2023 – Present

Information and Communication Technologies, third year. Studies cover the full web stack, from databases and server administration to front-end development.

Coursework: Web Programming · Advanced JavaScript, JSON, jQuery · XML, DTD, XSLT · Databases & T-SQL · Java web development · Linux administration · Virtualization & cloud · Computer networks · Software testing · UML

SELECTED PROJECTS

Online Bookstore

PHP · MySQL · AJAX

Full web shop for a graded university project: registration and login with email activation, AJAX filtering and pagination, image upload with thumbnails, admin panel.

Diamond Dreams

HTML · CSS · JavaScript

Online jewelry shop with search, category and price filters, wishlist, shopping cart with promo code and a checkout flow. Plain JavaScript, no frameworks.

github.com/MinaJevtic7523/DiamondDreams

CineHub

HTML · CSS · JavaScript · jQuery

Movie and series catalog loaded from JSON with AJAX: search, sorting, filters, pagination and a favorites list in localStorage.

github.com/MinaJevtic7523/CineHub

GlowNest

HTML · CSS · JavaScript · jQuery

Skincare website with a skin-type quiz, product gallery, testimonial carousel and validated contact form.

github.com/MinaJevtic7523/GlowNest

Restaurant website and portfolio

HTML · CSS · JavaScript

Responsive multi-page restaurant site, and my portfolio with a downloadable CV and validated contact form. Both on GitHub Pages.

Event and film management systems

PHP · MySQL

CRUD applications with AJAX, authentication and data export.

Java web applications

Servlets · JSP · Apache Derby

Login systems and CRUD applications deployed on GlassFish.
