LANGUAGES

Serbian – native

English – C1

Profile

Third-year Information and Communication Technologies student with hands-on experience building full-stack web applications in PHP/Laravel and MySQL, plus JavaScript front ends and Linux server setup. Looking for a stable remote or full-time web development role where I can keep growing as a developer.

Education

ICT College of Vocational Studies, Belgrade

Present

Information and Communication Technologies, third year. Web development, databases, networking, Linux administration, Java, software testing.

Selected projects

Knjižara Online · PHP, MySQL, AJAX

Full web shop built for a graded faculty project: registration and login with email activation, AJAX filtering and pagination, image upload with automatic thumbnails, and an admin panel.

Restaurant website · HTML, CSS

Multi-page responsive site (home, menu, gallery, about, contact) with sitemap and RSS feed, published on GitHub.

Personal portfolio · HTML, Sass

Responsive one-page portfolio with skills, services and project sections, scroll progress bar and SEO files (sitemap, robots.txt).

Bookshop and flower shop apps · JavaScript, jQuery

Client-side shops with product filtering, sorting, a shopping cart and LocalStorage persistence.

Event and film management systems · PHP

CRUD applications with AJAX, authentication and data export.

Java web applications · Servlets, JSP, Apache Derby

Login systems and CRUD applications deployed on GlassFish.

Also worked with

Laravel (Blade, Eloquent relationships, role-based middleware), SQL Server stored procedures, triggers and views, LAMP stack on CentOS virtual machines (Apache virtual hosts, NFS, rsync/SSH), virtualization (Xen, Hyper-V, VMware, AWS), CCNA-level networking.
